1. Claims 1-13 are allowed.

The following is an examiner's statement of reasons for allowance: the references cited disclose a circuit component having a circuit board, a second circuit board, a terminal, a length of the circuit board, a different in coefficient of thermal expansion (CTE) between the circuit board and the second circuit board, and some other claim elements, for example, US patent 4,970,577 teaches a semiconductor chip module comprising a circuit board and a second circuit board, and a terminal, the circuit board having a length of 10mm, and a different in coefficient of thermal expansion (CTE) between the circuit board and the second circuit board is 0.000002/celsius degree or greater, US patent 4,647,426 or 5,191,404 both show a device having first and second circuit board, and a terminal, the terminal having a C-shaped holding section, US patent 5,612,512 shows a high frequency electronic component having a dielectric substrate mounted on a base substrate by spacers . However, They do not teach or render obvious in combination of a circuit component having a terminal that separates a circuit board from a second circuit board by 0.3mm-0.5mm.
